REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The instant claims recite cleaning a semiconductor substrate, utilizing the steps of introducing a water based heated liquid onto the rotating semiconductor substrates and introducing ozone gas and carbon dioxide gas into the chamber to clean semiconductor substrate. The closest prior art of record are EP 0548596 and US 5,632,847 to Ohno et al.

EP'596 teaches application ozone gas to rotating substrate, while the substrate being sprayed with ultra pure water. The teaching of EP'596 does not anticipate or suggest fairly the step of introduction a carbon dioxide gas and the step of applying ultra pure water, wherein the water is heated within the temperature range as instantly claimed.

Ohno et al teach a method of removing contaminants from a semiconductor substrate including the steps of injecting ozone into aqueous acid solution and bringing ozone bubbles to the substrate surface to remove contaminants. The teaching of Ohno et al does not anticipate or suggest fairly the step of introducing a carbon dioxide gas into the processing chamber during the cleaning operation. The aqueous solution of Ohno et al is maintained at a room temperature, which is well below the instantly claimed temperature range.

No other prior art that anticipates or suggests fairly the cleaning process with the combination of steps as instantly claimed has been located as of the date of this office action. Therefore, claims 1-12, 14-16, 21-23 are allowed over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
